Alakanuk										
Bone Yard	5th st	62.68750000, 164.6683333	Old equipment	Vechiles, tanks, tires	51 items dumbred	2.5 acres	10/2020	Active		Phase I was conducted on July 7th, 2023. 02/27/2024-Phase I is completed
Native Store	Mouth of Alakanuk	-	Abandoned	fuel	7 building	1 acres	10/2020	Active		10/2020 Added into inventory 7/11/2022 Updated photos taken of site
Old BIA School North Bank	Alakanuk Slough, on North bank	-	Abandoned	asbestos, lead paint, waste from honey buckets	1 building	1 acre	7/12/2006	Cleaned up	Nonrestricted use	10/28/2022 YRITWC was informed that this site has been cleaned up
Allakaket										
Allakaket AP&T Generator Building	Adjacent to and east of the school property	66.5635, -152.6516	Petroleum (diesel)	Building remains with junk including spools of cable and wire	100 sq ft of soil and barrels removed ~2017	30x50 sq ft	5/30/2007	Division of Spill Prevention and Respx		2024 site visit. If sound and safety verified, the building would need major renovation for any use.
Allakaket Diesel Facility and Pipeline	SE Corner of A Street and 3rd Avenue	tank at 66.5632, -152.6494; pipeline schematics lost in 1994 flood	Petroleum (diesel)	Building remains with junk including spools of cable and wire	Unknown	40x50 sq Ft	5/30/2007	Division of Spill Prevention and Respx		2024 site visit. 2011 TBA identified petroleum saturated soil that remains. Containment berm was holding water without a sheen 8/15/2024, but a new playground and missionary facility across the road from the tank have raised concern.
Allakaket Old Gas Station/ Fuel Tank	near old airport apron	66.5624, -152.6550	Petroleum (gas)	2 tanks and dispensary shed	unknown	30x50 Sq Ft	5/30/2007	Division of Spill Prevention and Respx		2024 site visit. 2011 TBA identified petroleum saturated soil that remains. Containment berm "used to hold water." The berm fence is broken and it looks like pipes left the containment in three directions, which is not what the TBA shows.
Old Allakaket School tank farm	NE corner of school property, end of 2nd Ave	66.5643, -152.6438	Petroleum	historically an informal dump area	unknown	100x100		Division of Spill Prevention and Respx		2024 site visit. Tanks and informal dump area mostly cleaned up 2004-2008 when teacher housing added but poorly documented and not a focus in 2010
Arctic Village										
Old Generator Building	Along the side of the airport landing strip	-	Abandoned	Fuel, batteries, old machinery,	100 drums, 5 batteries, 10 vehicles, 1 building	2 acres	5/4/2007	Active		7/28/2022 Aerial photos were taken. Talks of potentially getting a phase I of site
Public Health Service Building	Middle of village	-	Abandoned	fuel, chlorine, and fluoride	1 building	50ft x 20ft	5/4/2007	Active		7/28/2022 updated photos were taken of site
Washeteria Tank	Next to the school	-	Fuel Spill	Fuel	1 tank	15ft x 15ft	5/4/2007	Active		7/28/2022 updated photos
Beaver										
BIA School	400 C street	-	Abandoned	Abestos, Lead, Petroleum	1 building		5/2007	Active		8/2022 Limited Hazardous Building Materials Inventory was done 1/18/2024 In summer of 2023 the building was demolished by NORTEC falicitated by Fish and Wildlife
Chevak										

Date updated: 12/10/2025											
YRITWC's Communities Listed in Contaminated Sites	Location	Latitude/Longitude	Primary Type of Contamination	Other Contaminants Present	Quantity	Area	Date Identified	Status of site	Completion Status	Response action previous year and upcoming year	
Old Fuel Bladder			Fuel(UNK if diesel or gasoline)	Fuel			2007, brought to our attention again Febuauary 2024	Active		2/27/2024- Located on the same property as Old Dumpsite, PM is working on New TBA application to include on current TBA project. 6/21/24 - Community Meeting conducted in Chevak as apart of the TBA 6/23-26/25 - Phase II conducted by ERG/ALTA 10/28/25 - Final TBA report submitted, results showed levels of petroleum contaminants above cleanup levels 11/10/25 - TBA concluded, final ABCA completed. Next steps is public comment period and establishing community preferred alternative.	
Riverside bluff property		61.525972927, -165.586611616	unknown	Solid waste	unknown	330 ft x 300 ft	7/11/2006	Active		9/12/23 Filled out the eligibility form. Upcoming in 2024 is applying to the Targeted Brownfield Assessment 2/27/2024-TBA was awarded, three more "dumpsites" were added to the site, they are located on the same property, and PM is working on New TBA application to include on current project. 6/21/24 - Community Meeting in Chevak and a site visit was conducted 10/28/25 - Final TBA report submitted, dumpsite sampled had no petroleum contamination above cleanup levels. ABCA focused on fuel bladder (11/10/25). Community working with FEMA for erosion control.	
Old School Building		61.528185596, -165.586272560	Abandoned	Diesel	unknown	300ft x 300ft	7/11/2006	Active		9/23 Was told it was cleaned-up	
Old School Tank Farm		61.528512330 -165.587517946	Diesel		unknown	unknown	7/11/2006	Active		9/23 Was told it was cleaned-up	
Fort Yukon											
School		-	Petroleum	Diesel	Unknown	unknown	6/4/2008	Active		06/06/2023- Tankfarm outisde school had slight leakage, a industry standard spill tarp is put underneath the leak. Ben Brandeberry didn't observe any soil staining in other areas.	
Old Landfill		-	solid waste		unknown	10 acres	6/4/2008	Active		06/06/2023- Land fill has been covered and is currently inactive. Some trash is on the road into the main landfill area. Signs and fencing have been put up to deter future dumping.	
Crowley Tank Farm		-	Petroleum		unknown	2acres	6/4/2008	Active		06/06/2023- Tank Farm has been completely removed. unknown if soil excavation took place. The site is now home to 5 monitering wells.	
BLM Fuel Storage		-	Petroleum		unknown	50ftx50ft	6/4/2008	Active		06/06/2023- BLM fuel storage was visited. Site didn't have any soil staining on ground or fuel smell.'	
Galena											

Date updated: 12/10/2025												
<u>YRITWC's Communities Listed in Contaminated Sites</u>	<u>Location</u>	<u>Latitude/Longitude</u>	<u>Primary Type of Contamination</u>	<u>Other Contaminants Present</u>	<u>Quantity</u>	<u>Area</u>	<u>Date Identified</u>	<u>Status of site</u>	<u>Completion Status</u>	<u>Response action previous year and upcoming year</u>		
Abandoned Old BIA School			Asbestos, Lead, PCBs			170 ft x 30 ft	6/14/2023	Active		<p>06/14/2023- Abandoned Child Services building. Is located behind the Fish and Wildlife building. Currently owned by Gana-A'Yoo. Was reportedly built in the 50s, may be newer. Windows and door are boarded up to deter trespassers. Possible lead paint. Was abandoned after 2013 flood moved the building 2-5 feet away from the road. May need Phase 1 in future.</p> <p>8/8/2024 YRITWC had a HBM done at the school. Planning to apply for ANCSA In 2025</p> <p>9/15/25 YRITWC awarded ANCSA Contaminated Lands funding 11/20/25 YRITWC held kickoff community meeting in Galena</p>		
Abandoned Yukon River Inn			Unknown		Unknown		6/14/2023	Potential		<p>06/14/2023- Located on private property. Artic entry is removed from the building. Main concern is that it is an eyesore in Galenas downtown.</p>		
Abandoned Store			HBM		unknown		6/14/2023	Active		<p>06/14/2023- Private property, building is abandoned. White building on the side of the store is being held up by two trees. Cieling tiles have fallen out of place.</p>		
Fish Plant		-	Petroleum	Diesel			5/5/2014	Active		<p>06/14/2023-Fish Plant has been demolished and removed. Currently site is a concrete pad where the building was and has scattered scrap metal. Community does not have fears over hazardous building material. Galena Environmental Coordinator, Brook Sanderson, may be interested in pursuing a phase 1 assessment when Tribe has capacity.</p>		
Grayling												
Native Store USTs	North Side of "C" Street, Between 2nd & 3rd Streets	62.905015, -160.065396.	Petroleum	Gasoline, Diesel	unknown	1 acre		Active		<p>9/27/2022 - visted Grayling to get a history of site 10/27/2022 Eligibility form complete. Plans of phase II on site 02/27/24- Grayling Phase II completed 0/2/15/2024 DBAC application was submitted</p> <p>8/27/24 LUST Funding was approved and workplan is being approved for removal of the USTs</p> <p>7/2025 - ADEC-YRITWC collaborated to complete additional sampling underneath the USTs. USTs were pulled from ground and shipped out of community. Sample results were not above "migration to groundwater" standards. Data gaps exist at groundwater and underneath tool shed.</p> <p>11/14/25 YRITWC submitted DBAC for additional characterization.</p>		
Hooper Bay												
Old Washeteria/Tank Farm			Possible Petroleum or Hazardous Materials		unknown	45 ft x 75 ft x 25 ft		Active		<p>05/15/2023-Abandoned and City Owned+ Paimut Tribe owned. Renovating for Paimut tribe meeting location. Little fear about Hazardous Building Material. Tank Farm emptied and then moved to Junkyard. Building will most likely be cleaned and in use in near future.</p>		
Junkyard, Sewage Lagoon			Solid Waste		unknown	3 arcers ~		Active		<p>05/15/2023- Legal dump, Lagoon breach imminent with flood or storm. Divit in lagoon boundary visible from Junkyard</p>		
Bunker/Old Lagoon			Solid Waste, Sewage		unknown			Active		<p>05/15/2023- Still in use, landfill on other side of lagoon</p>		

Date updated: 12/10/2025												
<u>YRITWC's Communities Listed in Contaminated Sites</u>	<u>Location</u>	<u>Latitude/Longitude</u>	<u>Primary Type of Contamination</u>	<u>Other Contaminants Present</u>	<u>Quantity</u>	<u>Area</u>	<u>Date Identified</u>	<u>Status of site</u>	<u>Completion Status</u>	<u>Response action previous year and upcoming year</u>		
Blueberry Hill Sewage Lagoon			Solid Waste		unknown			Active		05/15/2023- Visited during site visit, still pretty covered in snow. Original sewage lagoon covered and converted into dirt pile. Trash and other white goods surround property after Typhoon Merbok		
Abandoned Sewage Bunker	9 scattered around town				unknown	8ft by 10 ft		active		05/15/2023- Visited Hooper Bay. Bunkers are still there. Typhoon Merbok caused some of the bunkers to turn over, and moved them from thier previous location		
Hughes												
School Tank Farm	110 Front Street	66.045785, -154.259010	fuel	Gasoline	unknown	unknown		Active		1/19/2023 A phone meeting was called about moving forward on-site. 3/24/2023 Awarded the Target Brownfield Assessment (TBA). 7/17/2023 Contractors did a site visit and community meetings. 9/27/23 Phase II was canceled and moved to 2024. 6/17/24 Phase II was conducted in Hughes. DBAC was applied for cleanup 03/2025 - DBAC awarded 05/14/25 - YRITWC staff and ADEC staff held community meeting in Hughes to finalize the ABCA, Community chose offsite disposal as thier preferred cleanup method. 10/2025 - Correspondance with ADEC staff, ADEC is planning to conduct additional sampling, dewater desludging the tankfarm area, and establishing a contaminated soil management plan. Work is expected to begin summer 2026.		
Huslia												
Old Barge site		65.693462,-156.387164	oil	Vehicles	unknon	3.5 acres		Active		July 18th, 2023 Phase I was conducted 02/27/2024- Phase I completed		
Koyukuk												
Koyukuk City Bulk Fuel Facility	Behind the backhaul staging area for alluminum cans and used propane cylinders		Petroleum				5/21/2007	Active		06/13/2023- Two fuel tanks are remaining, behind the backhaul staging area. Both tanks appear to be 10,000 gal, empty, and site is overgrown with brush		
Koyukuk City Generator	Across from School	-----	Petroleum		Unknown	Uknown	5/21/2007	Active		06/13/2023- There was a historic spill that took place in front of the Old Generator Building and ADEC had excavated the soil. Inside the building represented clear environmental hazards. Buckets of used oil, a trash bin full of used oil, 3 old diesel generators, three bags of contaminated soil that were no longer contained, some e-waste, and the floor was saturated in used oil. Hazel reported this was a high priority for Koyukuk, but lack of capacity and funding is making cleanup difficult.		
Koyukuk Pipe Spill	Next to School	-----	Petroleum		Unknown	Uknown	5/21/2007	Active		06/13/2023-Ben Brandeberry was not able to locate the pipespill		
Koyukuk Sewage Lagoon	Behind washeteria, next to YKSD Bulk fuel storage facility	-----	Sewage		Unknown	Uknown	5/2007	Active		06/13/2023- During flooding some pipes experiance backflow from sewage lagoon, also occuring due to pipes freezing in winter. Main concern is that the sewage lagoon is overgrown with willows and other brush. City is looking into brush clearing services.		
Koyukuk Washeteria Pipe	Behind Washeteria	-----	Petroleum	Human Waste	Unknown	Uknown	5/2007	Active		06/13/2023- No visible obstructions or leaks.

<u>YRITWC's Communities Listed in Contaminated Sites</u>	<u>Location</u>	<u>Latitude/Longitude</u>	<u>Primary Type of Contamination</u>	<u>Other Contaminants Present</u>	<u>Quantity</u>	<u>Area</u>	<u>Date Identified</u>	<u>Status of site</u>	<u>Completion Status</u>	<u>Response action previous year and upcoming year</u>		
City Office	5111 Main Street, Russian Mission, AK 99657	61.785, -161.320278	None	None						02/27/2024- HBMI completed Fall 2023, found no HBM in the building		
Old Russian Mission Washeteria			e-waste, scrap metal, batteries				6/12/2024	active		06/12/2024 - Katie Nicks brought Ben Brandeberry to the site while looking at other sites in the village. Markings on storage containers indicate that the old washeteria was turned into a transfer site after it was put out of use. Signs indicate where old batteries and used oil should be placed. Washerteria was built 20 + years ago, unknown when it was changed into a transfer site.		
Old AVEC Building			White Goods, Petroleum		4 empty fuel totes, 2 have waste oil inside. Building surrounded by old refridgerators and freezers.		6/12/2024	active		06/12/2024 - Ben Brandeberry visited the site while walking around Russian Mission with Katie Nicks. History of how most of the material began to accumulate was unknown. Resembles a transfer site.		
Tribal Hall			HBM	HBM	unk	unk		Active		02/27/2024- HBMI planned for Spring 2024 through NORTEC. DBAC was also applied for the cleanup in case it is needed after the assessment 06/12/2024 - HBMI was conducted on June 12th, 2024. YRITWC is currently waiting for the assessment report.		
Scammon Bay												
Old BIA School Tanks	Next to the Old Washeteria		Petroleum		unk	unk		active		07/02/24 - Jordan Finney and Ben Brandeberry were made aware of this site from Angelo Utteyek, the current Tribal Administrator for Scammon Bay. A fuel release that occurred earlier in the summer was suspected to come from this source, approximately 45 gallons recovered. BIA relayed to Angelo that the tanks were emptied before they left. Located adjacent to the old washeteria.		
Old Water Treatment Plant			HBM	Petroleum				active		07/02/2024 - The old washeteria was originally built in 1986. Currently surrounded by "Caution" tape to deter trespassers. Angelo suspects that there are tanks, machines, and pipes inside the building. In 2015 ANTHC built Scammon Bay a new washeteria, and also agreed to demolish and remove the old building. Once the new washeteria was constructed ANTHC was made aware that the building contained lead paint and possibly asbestos. Because of cost to conduct lead/asbestos abatement the building wasn't demolished. 11/05/25 - HBMI report completed. XRF did not pick up any LBP. Asbestos in tile/mastic was found at 1.1mg/kg.
