

*Staging for Backhaul*

## **Backhaul: crucial for a safe and healthy landfill**

We work with 70 Tribes and First Nations along the Yukon River to assist and coordinate the removal of solid and hazardous waste. However, proper staging is paramount to successful backhaul.

However, backhauling can be very expensive so value your time and make sure your waste is staged properly and ready for shipment.

---

*If you have any questions regarding backhaul, please contact Katherine Brower at 907-258-3337*

---

## **Contact Us**

If you have any questions about the Solid Waste Department and how we could make a difference in your community, please give us a call!

## **Solid Waste Department**

*Healthy communities through training and education*

## What We Do

The YRITWC Solid Waste Department has many focuses including education, training, and technical assistance. Because cleanup work is so expensive, our objective is to decrease the likelihood of future pollution through education.

## Healthy Communities through education

YRITWC is pleased to partner with companies to offer trainings, free of charge to communities needing assistance.

- Freon Removal
- 40hr HAZWOPER and 8hr refresher
- Drum Crusher Operation
- DOT Regulations

**Plus, much more!** Please contact us for further training information.

---

***Thank you to our funder: USDA Rural Development for making all of this possible!***

---

*A total of 26 drums were condensed to a single pallet*

## Drum Crusher

Removing empty drums can save a barrel of room in your landfill. Villages who request the crusher will be responsible for the transportation.

---

*Do not put the following items in landfill:*

- *Lead Acid Batteries*
  - *Refrigerators*
  - *Freezers*
  - *Appliances*
  - *Electronics*
  - *Vehicles*
  - *Fluorescent Light Bulbs*
  - *Scrap Metal*
  - *Plus more...*
